SEO or Search Engine Optimization, also known as Search Engine Marketing, is generally considered as one of the most effective traffic generation strategies online due to its ability to drive massive traffic to your website for free.

The main purpose of SEO is to optimize your website for the keywords that people are using to search for on search engines like Yahoo, Google, Bing and MSN.

Basically, there are two elements that you need to work on in order for you to successfully drive free traffic to your website.

The first is by being On-Site Optimization. This is done by putting your keywords in the page, in the meta tags, title tags, and more.

The second is by being Off-Site Optimization. This is done primarily by getting quality backlinks to your site.

In the world of SEO, backlinks are generally those hyperlinks that come from other sites, which are pointing directly to your website. These are keywords represented as anchor text in the hyperlink.

Here are some important things to consider for an effective SEO.

- Make the title tag as the most significant keyword and include an enticing description that will drive people to visit your website. Bear in mind, the title tag is not the title of your web page. It is what the visitor sees at the top of the browser once they visit your site. An effective way to do this is to make a title tag in the form of a question, which suggests how you can help your visitors solve their problem.

- Put important keywords in your meta tag as well as ideal synonyms of your keywords.
- Rewrite complicated URLs so as to make them more SEO friendly. Now if you have a long and confusing URL in your page, your visitors will not like it as well as these search engines. This lessens the possibility for you to generate more traffic in your website. As much as possible, use short and simple URLs.
- Utilize important keywords in your header tags.
- Include keyword rich alt tag in the images in your page that describes the picture exactly.

It is free to join in forums and if you know exactly how to implement forum marketing you can use it effectively to drive massive traffic to your website. The good thing with this strategy is that forum marketing is not a complicated traffic generation method. All you need to do is to create an account on a number of good ranking forums and then create posts on them regularly.

Before starting to participate in any discussions or commonly known as threads, you should create and add an attractive signature to your account so as to lead the members of the forum site to visit your website. Almost all of these forums allow the users to put a few links in their signature, which will be displayed just below their post.

For example: [Read My Highly Recommended Posts at Mark Errol's Website.](#) (Hyperlink)

Forums with high activity are those sites that have a lot of interaction or participation as well as daily traffic. So the higher the number of participants is the higher the members that the forum has as well. And the higher the members are the greater amount of traffic you can get from it. These are

best forums that you should engage into if you want to have a better result from implementing this online marketing strategy. You will know when a forum has a high activity by the number of replies to a single group or thread discussion.

Before you should participate in any discussion, make sure that you are aware of the forum rules so you will be to participate in an acceptable manner. Read first the rules of the forum that you want to become a member so you will be guided properly.

Here are the things you should do to generate more traffic from a high activity forum.

- Find 2 high traffic, active forum sites that are relevant to your niche and then find topics (question-like topics) with a huge amount of activity (posts or replies). After which, at least spend 30 minutes or better yet 1 hour for two times a week providing quality (complete, informative, helpful, relevant) responses. Be sure that you leave a link of your website in your forum profile as we as an attractive signature.

However, if you are not knowledgeable enough about the topic, research and read more about it then from your own understanding, create a response that will give the best answer to the question. Note, never copy or rephrase the answer of others. Be sure also that your grammar is correct and the words you used are spelled correctly. In addition, if your first language is not English, as much as possible make your response in pure English and not a combination of two languages.

- Create a new thread or topic in the forum to share valuable information or tips that are based on truth. Do not make anything out of your imagination. As more and more

individuals are reading your tips or the valuable information you have shared and eventually they find it helpful, they will be driven to visit your website.

Take note: In creating a thread, make sure that the information you are providing are helpful, updated and informative. Something that could help them augment their knowledge about a given topic or teach them something they don't know as well as help them solve a certain problem.

Doing this is a powerful way to increase your YouTube views and at the same time getting additional traffic from the forum site. There are those forum sites that allow the users to post a video. If you find one, then take advantage of it.

You can determine if the forum site allows video posts if there are those members who actually did one. However, to make sure read their Terms Of Use.

For you to find a forum site relevant to your niche here's how to do it using Google search.

Go to [Google](#) and in the search box enter the keywords (your niche) using this format:

“keyword+discussion board” or “keyword'+forums”

One by one check the results so you can find the most ideal forum sites that are relevant to your niche.
